YOUR QUESTIONS, ANSWERED

QUESTION: How much does the CoolSculpting® procedure cost?

ANSWER: The price for CoolSculpting procedures varies depending on your areas of concern, the number of sessions needed, and your ultimate goals. Create a customized treatment plan with your provider that's tailored to your body, your goals, and your budget.

QUESTION: What does it feel like?

ANSWER: During your treatment, a gel pad and applicator are applied to the targeted area. Applicators that use vacuum will draw the tissue into the applicator cup. You may feel pulling, tugging, and mild pinching. Controlled cooling is then delivered to the targeted fat so you may feel intense cold but this sensation typically subsides within 10 minutes as the area becomes numb. Many people read, check email or even take a nap during their sessions. Afterwards, patients are usually able to return to normal activities.

QUESTION: Where does the fat go?

ANSWER: Once the treated fat cells are crystallized (frozen), the body naturally processes the fat and eliminates these dead cells. Once the treated fat cells are gone, they're gone for good.

QUESTION: Does it really work?
When will I see results?

ANSWER: Yes! The CoolSculpting procedure has a 95% patient satisfaction rate¹. Your provider will help you create an individualized treatment plan tailored to your specific goals. While some patients may see results as early as 3 weeks after their session, most dramatic results are usually seen 1-3 months after treatment.

QUESTION: What happens if I gain weight down the road?

ANSWER: Many people, after seeing the results from their CoolSculpting procedure, take even better care of themselves. However, if you do gain weight, you may gain it evenly all over your body, not just in the treated areas.¹

SCIENCE THAT LOOKS GOOD, TOO

Many of us have stubborn fat despite diet and exercise.

CoolSculpting® technology uses controlled cooling to target and kill only these fat cells.

In the weeks to follow, the body naturally processes the fat and eliminates these dead cells.

CoolSculpting results are long-term,¹ as treated fat cells are gone for good.

Results and patient experience may vary.

Before

After

After treatment, targeted fat cells are eliminated for good. Untreated areas will have no change in fat cell distribution.¹

ONCE IT'S GONE, IT'S GONE FOR GOOD

The results from some diets and fat-reduction treatments may leave you swinging back and forth between "before" and "after" versions of yourself.
